

PROFESSIONAL SUMMARY

Results-driven .NET Developer with 3 years of experience building scalable, high-performance APIs and enterprise applications using **.NET Core, C#, ASP.NET, SQL Server, and AWS**. Skilled in **microservices architecture, clean code principles, DevOps (CI/CD, DevOps), and Agile methodologies**. Proven track record of delivering **mission-critical applications** with **45%+ performance boosts** and **98% defect-free deployments**. Recognized for **technical leadership, innovation, and cross-functional collaboration**.

WORK EXPERIENCE

Associate Software Developer: Binmile Technologies, India, Noida -

May 2023 - Now

- Engineered and optimized high-performance, scalable .NET applications using .NET Core, C#, and ASP.NET, ensuring 99% uptime and system reliability.
- Led and delivered multiple mission-critical projects, ensuring on-time completion within scope, while implementing clean architecture, SOLID principles, and best coding practices to enhance maintainability and scalability.
- Collaborated cross-functionally in Agile & Scrum environments, actively participating in sprint planning, peer code reviews, and CI/CD pipeline implementations via DevOps.
- Boosted backend efficiency by writing optimized SQL queries and indexing strategies, reducing query response times by 45%, improving API throughput and database performance.
- Developed and secured RESTful APIs & microservices, implementing OAuth2.0, JWT authentication, and API security best practices, ensuring robust system security and seamless integration.

PROJECTS

Project: Desktop Application for Analysts (Tai - Services)

- Developed an offline-first desktop application using WPF and WinForms. End to end synchronization.
- Implemented data synchronization between web and desktop applications, ensuring seamless user experience.
- Enhanced data consistency and performance through rigorous testing and debugging

Project: Pledge- Unpledged Module – Edelweiss (Lead Developer)

- Led and delivered the Unpledge-Pledge Module within a strict deadline, ensuring 100% compliance with financial regulations while maintaining high code quality and system performance.
- Designed and implemented a secure, scalable backend using .NET Core, C#, and SQL Server, optimizing database performance by 35% through query tuning and indexing strategies.
- Enhanced API efficiency, reducing latency by 30%, by collaborating with stakeholders, product managers, and DevOps teams to ensure seamless integration with financial systems.
- Boosted system scalability by 40% by refactoring code and implementing asynchronous programming, caching mechanisms, and microservices architecture.
- Enforced best coding practices, ensuring 98% defect-free deployments through SOLID principles, unit testing (xUnit/NUnit), and CI/CD automation.
- Recognized for leadership and innovation, delivering a high-impact project ahead of schedule, earning client appreciation for execution excellence.

Project: Web Application for On-Demand Services- Tai Services US

- Developed a high-performance, scalable RESTful API for a US-based industrial chiller company, ensuring 99.9% uptime and seamless data transactions.
- Enhanced PostgreSQL database performance, improving data retrieval speeds by 40% through optimized indexing, partitioning, and query tuning while maintaining data integrity.
- Led and mentored a team of 3 developers, driving Agile best practices, CI/CD automation, and code reviews, boosting development efficiency by 35%.
- Integrated SonarQube for automated code quality assurance, reducing technical debt by 50%, enforcing coding standards, security

- compliance, and maintainability metrics.
- Optimized LINQ queries, reducing execution time by 45%, enhancing application responsiveness, scalability, and maintainability.

Project: Deemed Distribution – Edelweiss Alternatives (EAAA)

- Engineered a high-performance backend system for a FinTech application, ensuring secure financial transactions and seamless processing of high-volume data.
- Developed event-driven microservices architecture using .NET Core, enabling scalability and modular development for faster feature rollouts.
- Enhanced transactional security and compliance by implementing AES encryption, OAuth2.0 authentication, and role-based access control (RBAC), aligning with industry security standards.
- Automated performance monitoring and logging using logs and Application Insights, reducing system downtime and improving incident response time by 45%..

Project: CRM Application (Edelweiss)

- Provided **performance optimization and feature enhancements** for an enterprise CRM system.

EDUCATION

- BTech, Dev Bhoomi Group of Institutions, India, Dehradun 2019 – 2023 85%
- 12th, St. Xavier's Senior Secondary School. 2018 – 2019 80%
- High School, St. Xavier's Senior Secondary School, India. 2017 – 2018 9.4CGPA

TECHNICAL SKILLS

- Languages & Frameworks:** C#, .NET Core, .NET Framework, ASP.NET, WPF, WinForms, Python
- Web Technologies:** HTML5, CSS3, Bootstrap, RESTful APIs.
- Databases:** SQL Server, PostgreSQL, MySQL, Mongo DB.
- Tools & Platforms:** Azure DevOps, GitHub, Bitbucket, SonarQube, Visual Studios
- Methodologies:** Agile, Scrum, TDD, CI/CD, Unit Testing
- AI agents .** Cursor, Claude , Copilot , Chat gpt, gemini.

CERTIFICATIONS

- Microsoft Certified: .NET Core / Framework Development (135+ Badges)
- Earned Certification on Prompt Engineering & Programming with OpenAI by Columbia + University .
- ASP.NET Core – Cloud-Native App Development certified: Udemy.
- Master Go Programming: Complete bootcamp certified: Udemy.
- Microsoft Certified: .NET Core Developer (15 Trophies)
- Silver Medal In Python for Data Science (IIT Madras, NPTEL)
- Technical Support Fundamentals By- (Google - Coursera)
- Building a Face Recognition App Using Python By- (AI for India - Guvi)
- Generative AI Overview for Project Managers
- Jira Fundamentals Badge By - (Atlassian)
- SQL(Basic)/ SQL(Intermediate) /SQL(Advanced) By Hacker Rank
- C# Certification By - Hacker Rank.

AWARDS

- Future Star of Binmile Award at Binmile Technology Annual Party, rewarded for being the most consistent and outstanding performer.
- Winner – National Science Week (Digital Innovation Category).
- 1st Place – "War of Words". Winner Debate Competition (DBUU Campus).
- Winner – "Prove Me Wrong" Debate Competition.

LANGUAGES

- English
